Outfit-Chooser

What is this page about?

Have you ask questions like: How should I dress today? or Which is the best outfit that I have?

No more, we provide you with a way of keeping track of your clothes and outfits.

Share your best outfit combinations and showoff your fashion skills!

How to use the page?

Look for other persons outfits at the bottom of the page and login to make your own. First uploding pictures of your clothes and then create and outfit.

Help us improve by sharing your feedback.

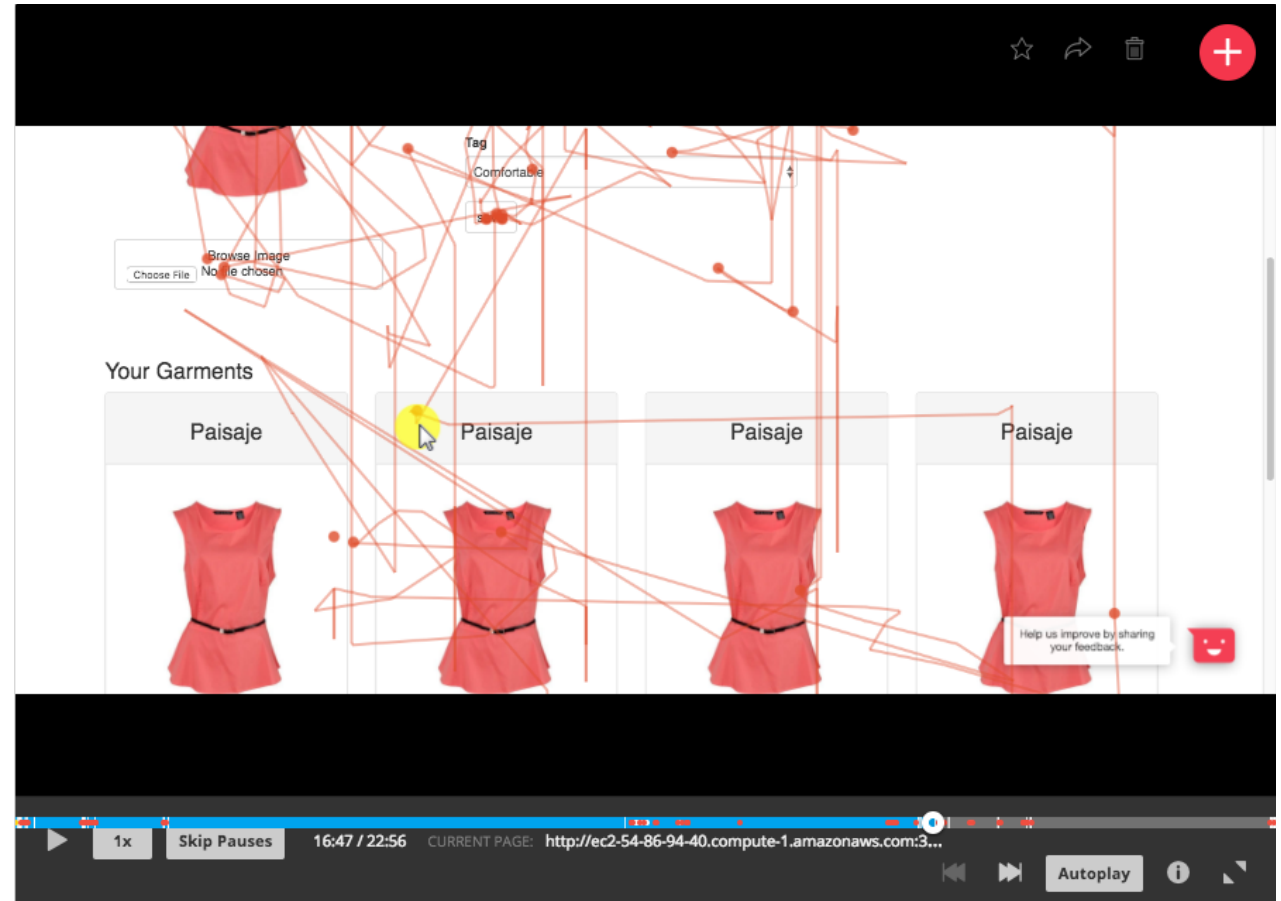

hotjar

Usability tests

- We ask 8 Students to test the app. We use Hotjar to record their interaction.
- After that, we interview those students to ask them for feedback.

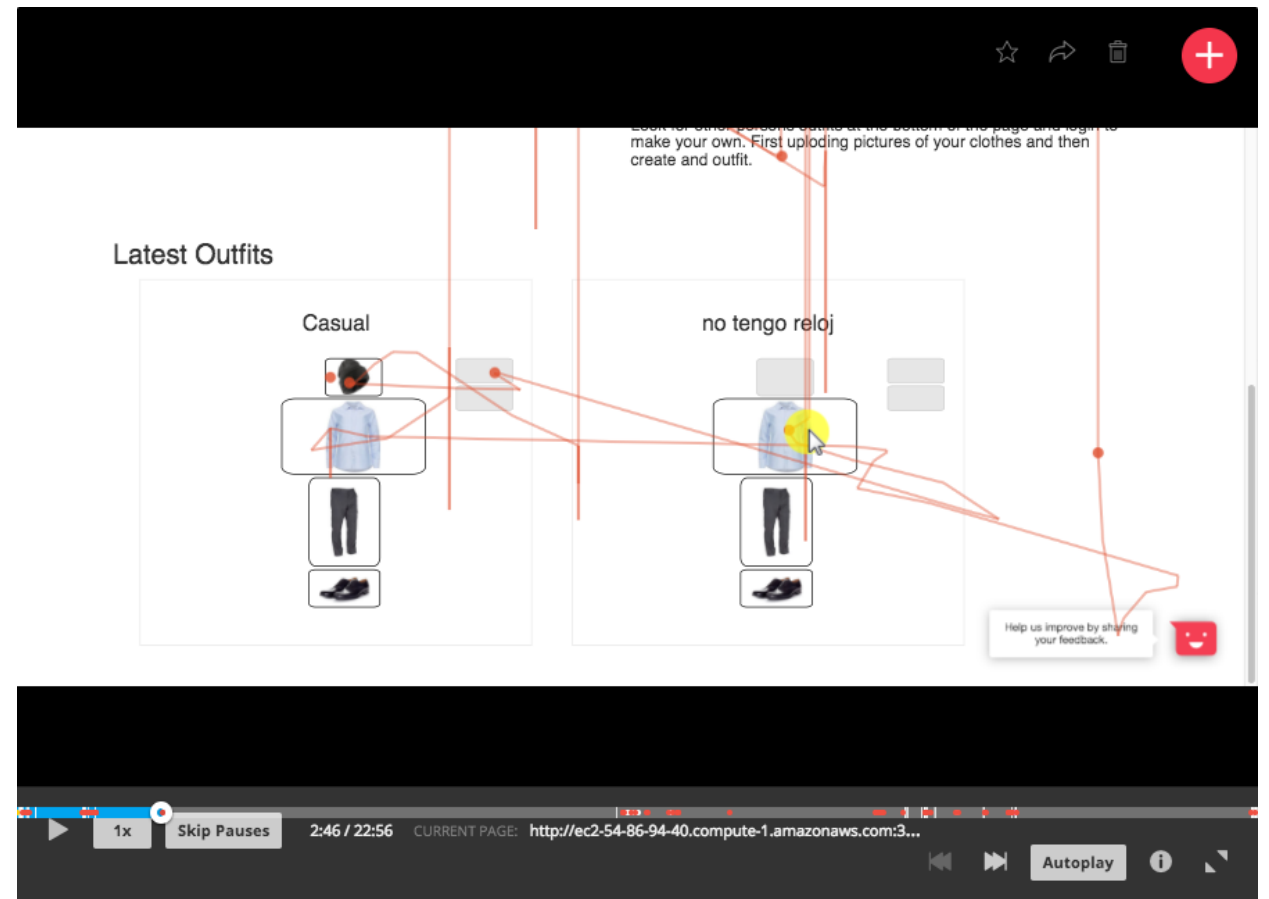

Usability tests - Results

- Problems saving, because the save action didn't have feedback.
- We solve it using sweetalert to inform the user about the save action. And then we force a scroll down to see the 'Your Garments' section.

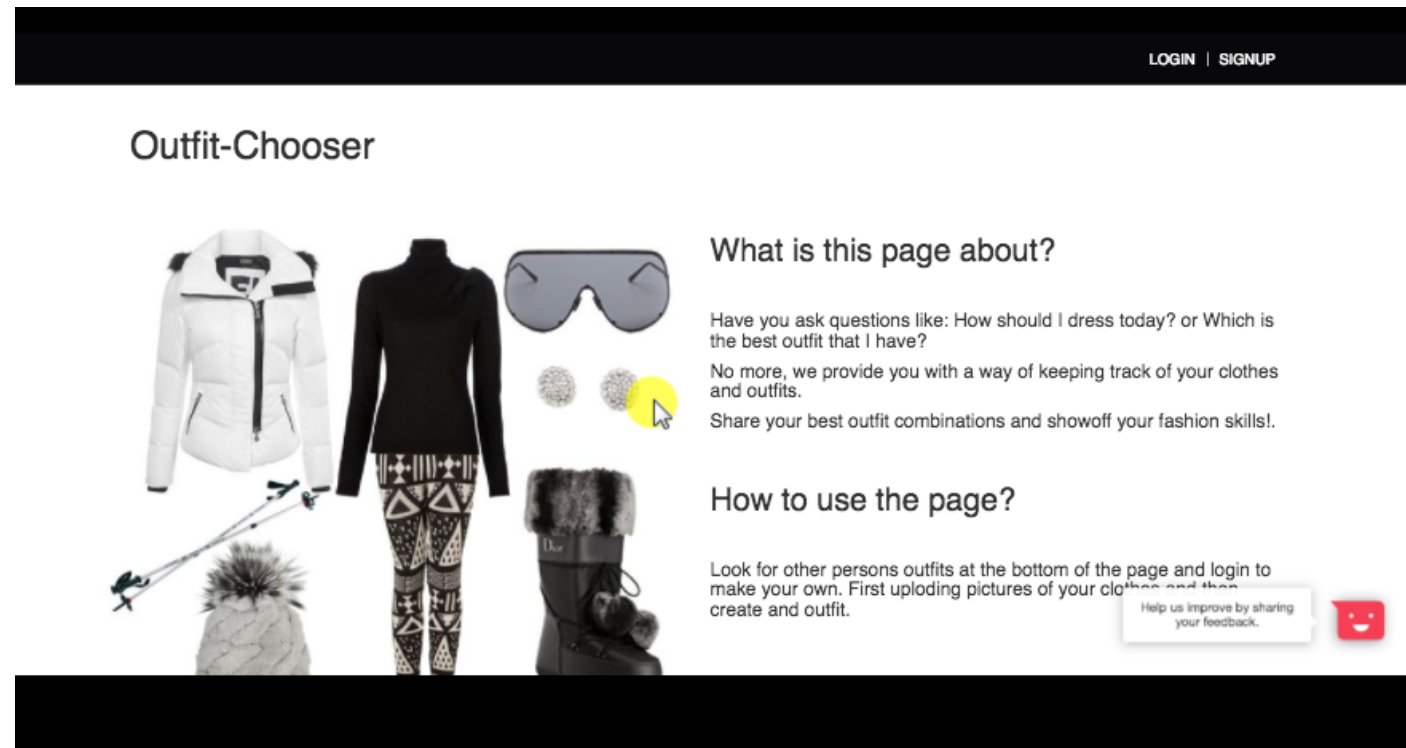

Usability tests - Results

- The users didn't know where they can click and where they can't.
- We solve it using sweetalert to inform the user if there were an action to do or not.

Usability tests - Results

- The girls interviewed said that our web page was not flashy or interesting.
- We solve it changing the design of the whole page.

Usability tests - New Design
